

SARS-Cov-2 VIRUS EMERGENCY

MEASURES ADOPTED TO PROTECT THE HEALTH OF STUDENTS ATTENDING UNIVERSITY FACILITIES, FROM 27/09/2021

Anyone who enters the University's facilities must possess and present the **Green pass** or, alternatively, a certificate of exemption issued by the competent health authorities.

The security staff will carry out check possession of the access requirements at the university facilities' gates, on a random basis.

Students must also declare their possession of the **Green Pass** when reserving a classroom seat through the *GoIn Student* system, in order to successfully complete the activity.

All teaching activities, including workshops, must be carried out in presence, respecting the social distance of one meter, where possible, and wearing at least a surgical mask for all the duration of the workshop.

All other curricular activities must be carried out in the classroom, including, for example, profit examinations and inter-course tests, teaching laboratories and exercises. Internships and educational visits will be held in accordance with the provisions of the Schools and Departments and the instructions of the Prevention and Protection Service.

Until the 28th February 2022, lectures will be transmitted via the **TEAMS platform**.

For examinations professors may authorise the student, who has booked a place, in isolation or quarantine to take the exam on another date, within the same examinations' session.

The number of usable seats in each classroom will normally be 50% of the nominal capacity. Where logistical and organisational conditions allow, and in compliance with current regulations, the structures providing the teaching activities may be authorised to use the classrooms to their nominal capacity.

Access to classroom seats will always be regulated through the *GoIn Student* system.
